

Breakfast Briefing On Advanced Analytics

ACT Operations Research (ACT-OR) and SIMIO are pleased to invite you and your colleagues to a unique event.

ACT-OR and SIMIO offer new and innovative ways to control and reduce costs while you make the right decisions to run your business. The briefing focuses on fast-to-implement math-models driving a high ROI from operational and strategic decisions.

- At ACT-OR, we build decision support systems based on mathematical, statistical and simulation tools.
- Built on the "Intelligent Object" paradigm, SIMIO Simulation is particularly known for its modeling speed and 3D functionality.

BRIEFING SPEAKERS

After a networking session and a light breakfast, we will hear from our high-profile speakers including Dennis Pegden from Simio, Patrick Callaghan and Raffaele Maccioni from ACT-OR.

- Dennis, Ph.D., founder and CEO of Simio LLC, has over 30 years of experience in simulation and scheduling and has been widely recognized as an industry leader. Dennis led the creation of market-leading simulation products
- Patrick, Business Executive of ACT-OR US, has a long experience supporting enterprise buying complex software solutions
- Raffaele is the ACT-OR's founder. With his over 20-year's experience supporting reputable companies using advanced analytics, he leads the team who develop math-based technology.

BENEFITS

Understand how to model and test real systems, business and tech assumptions.

- Together to grow stronger!
- Together to have a more sound reputation!
- Together to do better with less effort!

REGISTRATION

RSVP no later than Friday, June the 7th.

Please email Patrick at Patrick.Callaghan@act-OperationsResearch.com or call (412) 477-7168.

WHERE

Pittsburgh Technology Council - 2000 Technology Dr #100, Pittsburgh, PA 15219

WHEN

2013, June 25th at 8:30 am.

Simple, creative and effective solutions to complex problems! Optimization, simulation and forecasting technology.
